

"DISCOVER THE APEX OF SOUND"

"THE ESSENCE OF HIGH FIDELITY"

"ACOUSTIC PURITY, UNMATCHED PRECISION"

PINNACLE

PHONO MM / MC

Welcome to the Pinnacle of Sound

The Pinnacle High-Fidelity Phono Preamp represents the apex of audio precision and acoustic perfection. Designed for audiophiles by audiophiles, this unit is a testament to the beauty of sound when it is transmitted as intended: pure, unadulterated, and true to its original form.

Heleyna

Unparalleled Performance

With a distortion rate of less than 0.02%, the Pinnacle delivers sound so clear, you can distinguish the breath of a flautist from the softest touch of a violin bow. The signal-to-noise ratio towers at an impressive 74 Dbs, ensuring that each note is heard in its full glory without the interference of background noise.

Audio Fidelity Redefined

Our RIAA-certified balanced active two-stage audio equalizer is engineered to restore the integrity of your vinyl records, reproducing sound as vivid and dynamic as the live performance. Whether it's the subtle undertones of a jazz bass or the full-bodied chorus of an opera, the Pinnacle elevates your listening experience to new heights.

Catering to Your Cartridge

PINNACLE

Understanding the needs of turntable enthusiasts, the Pinnacle comes with an adaptable input impedance setting. Whether you're using a Moving Magnet (MM) cartridge at 47k or a Moving Coil (MC) at 100 Ω , our preamp ensures optimal alignment with your turntable's output, offering a customized listening experience that caters specifically to your audio setup.

Effortless Energy

The output impedance stands at a perfect 100Ω , complementing a wide array of power amplifiers in the market. With an output voltage gain that reaches a maximum of 6.9 Volts, the Pinnacle can drive your system to its fullest potential, offering 35 db gain for MM cartridges and 55 db for MC cartridges, thus ensuring every detail is magnified and every beat is felt.

A Symphony of Tubes

At the heart of the Pinnacle lie the Beijing 6N11X4 and Dawn 12at7X2 tubes. These carefully selected tubes are known for their warm, rich, and dimensional sound. They are the soul of the Pinnacle, imparting a sonic signature that is both sophisticated and sensuously inviting.

Natural Resonance

The soul of music lies in its natural resonance—the true timbre of instruments and the authentic tone of voices. The Pinnacle captures this essence with an unwavering commitment to authenticity. Its advanced circuitry is designed to produce a sound that's not just heard but felt—an echo of the original recording room, the artist's intention, and the air that vibrated with their music. The warmth of the tubes complements this naturalistic approach, offering a sound that is not just reproduced, but reborn in its truest form.

Holographic Soundstage

Enter the realm of auditory illusion with the Pinnacle's holographic sound presentation. The term 'holographic' in audio refers to the three-dimensional soundstage that a system can create. The Pinnacle doesn't just play music; it breathes life into it. The placement of instruments and vocals is so precise, so vivid, that it transcends the boundaries of your listening room. It's as if the walls dissolve, and you're transported to the heart of the performance. Each strum, each chord, each crescendo is mapped in the space around you, creating an immersive experience that is the hallmark of live music.

Craftsmanship and Quality

Every Pinnacle unit is a masterpiece of craftsmanship. Inside, the hand-selected vacuum tubes are arranged in a configuration that maximizes their sonic potential. The external design reflects the quality within—sleek, and purposeful, with tactile controls that respond with satisfying precision. The robust build quality means that the Pinnacle is not just an investment in your current listening pleasure but a legacy piece for the audiophile of the future.

PINNACLE

The Pinnacle Experience

When you choose the Pinnacle, you're not just selecting a piece of equipment; you're choosing a new pinnacle for your auditory experience. With its unparalleled holographic sound and natural resonance, you'll rediscover your music collection, hearing details that were previously obscured. The sound is so lifelike, it's as if the performers are playing just for you, in a concert where you are the honored guest. Welcome to the Pinnacle experience, where every listen is a performance, and every performance is a revelation.
